

Exercise 1 – Login Exercise

The next page has 3 images of Login Screens.

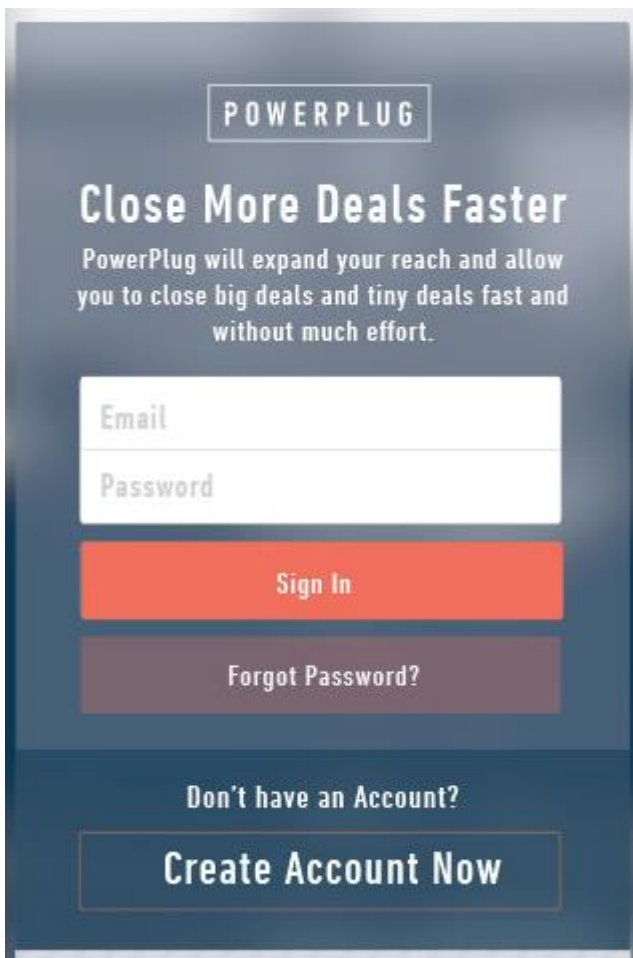

Please assess them, and provide feedback on the following for **each** image:

- your initial thoughts
- questions that you would ask as a tester (to the developers, client, PO, etc.)
- improvement suggestions you would make to the page/login flow (both functional and design)
- what considerations you would have if you had to test the *backend* of a Login Page

NB: This exercise does not have a specific “question”, per se, but is instead intended to determine your attention to detail, analytical thinking, and questions you would ask before being assigned to test a Login Page.

You may provide your feedback in any form you see fit. i.e. test plan, bullet points, user scenarios etc.
